

YOUR BUSINESS TECHNOLOGY PARTNER

Catalog of Services

ATS is a trusted business technology partner, delivering innovative IT, voice, cloud, and security solutions to small business and medium enterprise organizations. Our mission is simple:

- Providing strategic expertise and align right-sized technology solutions that empower businesses to thrive in an ever-changing digital landscape.
- Be your business technology partner.

Managed IT Services

- **Network Management:** Ongoing monitoring and support of network ensuring optimal performance.
- **Help Desk Support:** 24/7 technical support for end-users.
- **Server & Cloud Management:** Maintenance and administration of servers and cloud-based environments.

Cybersecurity Solutions

- **Risk Assessment & Compliance:** Audits, vulnerability assessments, and regulatory compliance consulting.
- **Threat Monitoring:** Real-time monitoring and incident response services to protect against cyber threats.
- **Data Protection:** Encryption, backup, and disaster recovery and business continuity solutions.

Pro-AI Ascend

From First Steps to Full Stride

Turn AI from an unmanaged risk into a secure, productive business advantage.

Pro-AI Ascend is ATS's structured **Crawl → Walk → Run** approach to AI adoption, helping organizations establish appropriate policies and security controls, select and deploy AI tools, train employees, and ultimately introduce AI-powered workflows and automation.

Core Philosophy

Proactive: Strategic planning and dynamic partnerships

Professional: Certified specialists and 24/7 support

Proficient: Clear, informed solutions for optimal performance

Cloud Services

- **Cloud Migration:** Planning and executing the move to cloud environments with minimal disruption.
- **Cloud Infrastructure Management:** End-to-end management of cloud resources and services.
- **Backup & Recovery:** Reliable cloud-based backup and data recovery solutions.

Voice Solutions

- **Cloud VoIP & UCaaS:** Feature-rich platforms combining voice, video, messaging, and collaboration tools.
- **Hybrid IP Systems:** Flexible solutions that integrate with existing infrastructure for scalability.
- **Microsoft Teams Integration:** Seamless calling features without replacing your current setup.
- **End-to-End Services:** Design, installation, training, and ongoing support for smooth adoption.

Training & Education

- **Technical Training:** Programs for IT teams and end-users.
- **Workshops & Seminars:** Sessions focused on new technologies and best practices.
- **Documentation & Resources:** Comprehensive guides, manuals, and support documents.

Strategic Consulting

- **Strategy & Planning:** Expertise for digital transformation, project planning, and IT roadmaps.
- **Process Optimization:** Streamline workflows and business processes for enhanced productivity.
- **Technology Assessment:** Evaluation of IT infrastructure and recommendations for improvement.

Hardware & Infrastructure Solutions

- **Procurement & Installation:** Sourcing and implementation of hardware and networking equipment.
- **Maintenance & Upgrades:** Regular maintenance, troubleshooting, and equipment upgrades.
- **Facility Management:** Data center setup, environmental monitoring, and physical security solutions (video surveillance and access control).

Carrier Services

- **Procurement & Installation:** Internet connectivity and telecom services.
- **Contract management**
- **Agnostic Carriers:** Able to work with all carriers nationally.

National Account Program

- Supports multi-site and multi-state organizations with ATS services nationwide.
