## **HD VIDEO CONFERENCING SOLUTION FINALLY MATURES**

*ATS Communications Delivers  
Powerful Technology to SMBs*

SACRAMENTO, CA - November 1, 2012 – In today's market, large enterprises have come to rely heavily on technology in order to help accelerate their businesses. HD video conferencing has long been thought to be a powerful technology reserved exclusively for use by large-scale enterprises. However, recent developments in technology have lowered the total cost of ownership and now smaller organizations can benefit from this impactful technology. In an increasingly global economy, many organizations are looking to reduce travel expenses, collaborate with remote workers and foster real-time collaboration across all areas of a business. HD video conferencing allows organizations to accomplish this and gain competitive advantage in their industry.

Simply explained, HD video conferencing allows users to conduct face-to-face meetings without leaving the office. Multiple parties can collaborate with one another on various projects regardless of location, instantly increasing office productivity. Essentially, this dynamic technology elevates our expectations of basic web and audio conferencing tools. Users can now broadcast important meetings to other locations, reducing travel expenses and saving lost time. Another factor behind video

conferencing's recent success is due to its ability to show non-verbal communication and increase the "human feel" of meetings.

"Our customers have always expressed a very strong interest in the capacities that videoconferencing solutions deliver but we didn't to bring this technology to our customers because the cost for this technology was simply too high," stated John Zeller, President/CEO at ATS Communications. "We have built our reputation over the years by truly partnering with our customers, concerning ourselves with their needs and obligating ourselves to only provide them with technology that significantly boosts employee productivity and increases their bottom line. We assert that at the end of the day, technology needs to increase a business' profitability and give them a competitive advantage or it should not be implemented. HD video conferencing has finally matured to the point where our customers can enjoy the benefits of this technology while simultaneously increasing their overall profitability. We've been excited to see how different industries have been applying video conferencing to their businesses and have learned quite a bit throughout our experiences. We look forward to helping our customers get the most out of their technology."

### **ABOUT ATS COMMUNICATIONS**

ATS Communications is a business' complete voice and data partner with expertise on a wide range of voice and data products. Their services match small and medium size enterprises with optimized technology that provide best business practices. This core philosophy motivates ATS to provide technical solutions and creates a competitive advantage for clients' business and positively impacts their bottom line. With 35 years of experience, ATS has gained an excellent reputation for designing, implementing and proactively supporting solutions that focus on converging voice and data applications and has been recognized for outstanding performance by several of their strategic partners including Cisco and Toshiba. Additionally, ATS has been identified as one of the Top 25 East Bay companies in their industry by a leading publication for six consecutive years. These credentials have allowed ATS to grow and partner with businesses throughout the greater Bay Area and Northern California. ATS has three offices located in Concord, Sacramento and Redding. For more information, call their corporate office in Concord at (925) 602-1500 or visit [www.atscommunications.com](http://www.atscommunications.com).
