ATS COMMUNICATIONS OFFERS CUSTOMERS VIRTUAL HOSTED OFFICE SYSTEMS

*Leading Unified Communications
Provider Helps Customers Take
Advantage of Cloud Based
Technologies to Advance Their
Business*

SACRAMENTO, CA – April 29, 2013 – ATS Communications, an industry leader in unified communications, announced today that the company is providing its customers with Virtual Hosted Office systems designed to help small to mid-sized businesses take advantage of the latest in cloud-based technologies.

Cloud-based technologies are not only part of the future of technology, they have become an integral part of the present. Virtual Hosted Office systems provide secured access to company data and applications from anywhere in the world and small to mid-sized businesses are deploying this technology in order to remain competitive in today's economic environment. The driving forces behind this growth are increased profitability and enhanced IT infrastructure security.

“Many small to mid-sized businesses have absolutely no need for on-site servers, and they can just as easily be hosted in the cloud for a fraction of the cost. Additionally, Virtual Hosted Office systems are continuously

updated which provides dramatic cost savings over purchasing and repurchasing servers, comments John Zeller, President/CEO of ATS Communications.

“Furthermore, these systems provide all hardware and operating system upgrades necessary for proper server upkeep, which translates into reduced costs for business owners.”

Virtual Hosted Office systems also bring an element of enhanced IT security to SMBs. Since systems are hosted off-site in multiple, excessively secure, “disaster-proof”, 24x7x365 monitored, “bunker-style” facilities, companies are able to operate with much greater levels of security. In fact, Virtual Hosted Office Solutions are compliant with all HIPPA regulations, Sarbanes-Oxley and other security regulation laws as well.

Cloud-based technologies have revolutionized the way today's businesses function, and companies like ATS Communications are adding value to their customers by introducing advanced technologies like Virtual Hosted Office systems.

ABOUT ATS COMMUNICATIONS

ATS Communications is a business' complete voice and data

partner with expertise on a wide range of voice and data products. Their services match small and medium size enterprises with optimized technology that provide best business practices. This core philosophy motivates ATS to provide technical solutions and creates a competitive advantage for clients' business and positively impacts their bottom line. With 35 years of experience, ATS has gained an excellent reputation for designing, implementing and proactively supporting solutions that focus on converging voice and data applications and has been recognized for outstanding performance by several of their strategic partners including Cisco and Toshiba. Additionally, ATS has been identified as one of the Top 25 East Bay companies in their industry by a leading publication for six consecutive years. These credentials have allowed ATS to grow and partner with businesses throughout the greater Bay Area and Northern California. ATS has three offices located in Concord, Sacramento and Redding. For more information, call their corporate office in Concord at (925) 602-1500 or visit www.atscommunications.com.
