## **ATS COMMUNICATIONS HELPS SMBS KEEP THEIR NETWORK RUNNING SMOOTHLY WHETHER YOU'RE USING IPHONES, DROIDS OR VOIP**

*With More Employees "Bringing Their Own Devices", Networks Are Getting More Complex*

REDDING, CA - December 19, 2012 - ATS Communications, a leading provider of unified communications and technology management services, announced today the launch of their Bring Your Own Device (BYOD) management services. With more and more organizations finding themselves facing the challenges of a BYOD environment, ATS Communications' solutions are coming at just the right time.

Increasingly, organizations are recognizing the need for a diversity of support in their infrastructure. They're facing new challenges every day in trying to support mesh wireless, transient users, and meet the security challenges that go along with it. In addition, as employees continue to seek out best of breed solutions for individual tasks, today's networks face are far from unified networking environment.

ATS Communications lets organizations be proactive in managing their infrastructure. This means reduced costs, better security, and a network that's more aware of who and what is connecting to it.

Organizations need to be alerted when a new device is coming onto the network. ATS Communications helps an organization scan a device to make sure it's not bringing with it security risks, and establish proper security measures for access control levels, including the separation of employees from guests. ATS Communications can identify which devices are using the lion's share of an organization's bandwidth, and make infrastructure changes to accommodate the changing needs of the BYOD user.

"A business should be able to focus on what it does best and our solutions free up businesses to do just that. By bringing proactive infrastructure management to the BYOD environment, our clients enjoy greater efficiency, security, and agility. A more efficient network means that our customer's technology is running to its fullest capacity. When we're increasing overall productivity our customers are dropping more to the bottom line and that's how we know that our customers have a leg up on their competition," stated John Zeller, President/CEO of ATS Communications.

### **ABOUT ATS COMMUNICATIONS**

ATS Communications is a business' complete voice and data partner with expertise on a wide range of voice and data products. Their services match small and medium size enterprises with optimized technology that provide best business practices. This core philosophy motivates ATS to provide technical solutions and creates a competitive advantage for clients' business and positively impacts their bottom line. With 35 years of experience, ATS has gained an excellent reputation for designing, implementing and proactively supporting solutions that focus on converging voice and data applications and has been recognized for outstanding performance by several of their strategic partners including Cisco and Toshiba. Additionally, ATS has been identified as one of the Top 25 East Bay companies in their industry by a leading publication for six consecutive years. These credentials have allowed ATS to grow and partner with businesses throughout the greater Bay Area and Northern California. ATS has three offices located in Concord, Sacramento and Redding.
