Features & Benefits

igeacom

"Quality care through innovative technology…IgeaCare"

Seamless integration of all equipment into ONE SYSTEM:

- ONE point of contact for all communication needs
- Embedded call accounting and voice mail
- Fully integrated wireless peripherals

Reduced installation requirements and cost using existing Infrastructure:

- Line powered units eliminate the need for proprietary cabling

Unsurpassed reliability and unit supervision:

- Total system supervision and integrated battery back up (unit) ensures constant connectivity
- Modular concept allows for scalability and flexibility (PBX)
- Secures your investment through time with standard telephony equipment
- MAC (Modify Add Change) and PBX supervision can be performed remotely

Unprecedented solution to create new revenue stream:

- Telephone services
- Wireless emergency devices

Non-intrusive technology and design:

- Respects individuals' privacy without compromising security
- Two way voice, resident reassurance that encompasses full duplex quality communication with unlimited non-blocking speech paths

The igeacom applies telephony based standards that allow your organization to provide professional and personalized services for your residents:

- Unified solution and intuitive operation reduces the need for specialized training
- Instant two-way conversation reduces unnecessary traveling for staff
- Embedded call escalation in the resident unit and at the PBX level ensures that no call goes unanswered

Optimizes efficiency/marketing through automated utility/service requests with pre-recorded messages:

- Relieve staff from answering routine calls

Wireless peripheral that can be easily relocated:

- Wireless pull stations can easily be placed to adapt to the resident's furniture placement.

Extended battery life:

- Drastically reduces maintenance expenses and cost of ownership over time

Flexibility of individual settings (resident unit):

- Individual room and call points assignment
- Easily upgradeable (wireless)
- Call point priority
- Escalation
- Retry attempts
- Dome light scheme
